

RHUB TurboMeeting Web Conferencing Overview

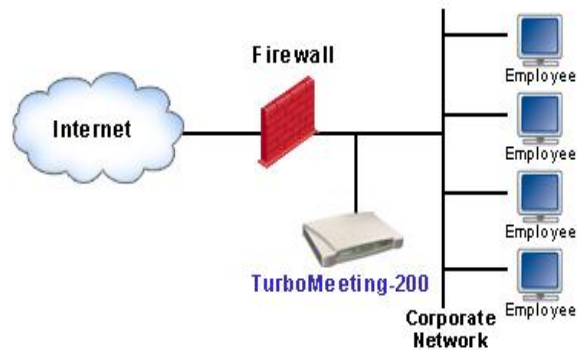

1. [Your Own It, You Control It](#)
2. [100% Attendance, No Download of Any Kind](#)
3. [4-in-1, Outstanding Value](#)

You Own It, You Control It

Turbo Meeting (from RHUB), an On-Premise Appliance is delivered to you ready to go. Just install it on your network and begin 24x7 unlimited Web conferences. No on-going IT support is needed. Your Turbo Meeting Appliance is updated automatically.

Gain the advantages of TurboMeeting On-Premise appliance deployment:

- No more monthly fees
- Enhanced meeting security with [the ultimate security protection - your firewall](#)
- Better performance - all LAN users work at LAN speeds. It is especially useful for collaboration for those applications with moving images such as 3D CAD design, flash graphic design, etc.
- Easier and secured integration - launch meetings from you internal home page or other enterprise applications
- Branded with your company name and logo

The TurboMeeting-200 & 500 is perfect for any size of office. So compact and quiet with a fan-less operation. This appliance works on less than 4.5 watts to help keep your office green.

100% Attendance No Download of Any Kind!

If you have used web conferencing before, you would experience some of your attendees failing to join in your conference and the whole conference falls apart. Let alone the frustration and time taken by your attendees to download and install meeting client software. There are many reasons for the failure:

- Computer locked down by corporate IT policy that prevents installation of any software
- Blocked by firewall and proxy servers
- Blocked by anti-virus and anti-spy software
- Unsupported platforms like Mac, Linux, Unix, etc.
- Wrong or missing Java Virtual Machine or Flash installation

Patent Pending TurboMeeting Universal Attendance

100% attendance by a browser only has been demanded since day one when web conferencing started. Today, TurboMeeting presents the first truly universal attendance web conferencing solution.

- Your meeting attendees do not need to download any kind of software, no Java Applet, no Flash and no documents.
- As long your attendees can view Google/Yahoo maps with their browsers from any of the platforms: Windows, Windows Mobile, Mac, Linux, UNIX and iPhone, we guarantee they can join your meetings and see your presentation. If your attendees cannot join your meetings, just return our product for full refund..
- Joining a meeting is as easy as typing a URL and as fast as 5 seconds depending on your attendees' Internet connection speed.

To see how it works? Simply follow the steps below to have a free trial:

http://www.rhubcom.com/front/product_review.htmhttp://www.rhubcom.com/front/product_review.htm

1. Click the "[Try it](#)" on the left side
2. Click the "[Register here](#)" link
3. Download and install TurboMeeting. Because you are the meeting host, you need to download and install TurboMeeting. The no-download function applies only to your attendees.
4. Run TurboMeeting and start to Host an unscheduled meeting
5. Select the "Seminar" meeting type. This automatically directs your attendees to the no-download join-meeting mode.
6. Now, send your attendees the meeting URL for them to join your meetings.

TurboMeeting supports more sophisticated and powerful meeting types other than the seminar no-download meeting type. Those meeting types require meeting attendees to download and install TurboMeeting.

4-in-1, Outstanding Value

The On-Premise TurboMeeting Appliance bundles four applications (implemented as four meeting types in TurboMeeting) in one delivery:

- **Web Conferencing** (the Interactive Meeting type in TurboMeeting) - Every attendee (PC and Mac) can interact in the meeting. Each can be Presenter (show their screen) and/or Controller (control the Presenter's computer)
- **Remote Support** - Simplifies connecting to another computer to control and support it. Auto Presenter/Controller set up, File Transfer, Reboot remote computer are supported.
- **Remote Access to My Computer** - Enables you to access a remote unattended computer. You can access your office or home computers from your traveling laptop.
- **Web Seminars** - The unique Universal Attendance technology makes seminars simple and easy. Every attendee can join. 100% attendance!

TurboMeeting 4-in-1

- Web Conferencing**
- Remote Support
PC & Mac**
